There is now no doubt that the remarkable weather that has prevailed for ten days past has caused the fruit buds to swell to the danger limit. A ride through the country roveals the fact that this same weather for another week will bring out blossoms of some of the earlier varieties.

street car lines have been in operation, and a motorman in the employ of the Wheeling company, who has handled the lever all over the country, is responsible for the statement that Wheeling's small boys have more of the daredovil in their make up than those of any community within his experience. While this somewhat surprising statement was being made the car was bowling down Chapline street above Caldwell's Run. A boy of about thirteen years stood near the track a short distance abend, and the motorman remarked that he was one of the most reckless in a section that seems to abound with recklessness. The car was within about thirty feet of the lad when he walked deliberately across the track. The motorman gave an incoherent cry of mingled rage and despair, rang the bell violently and put on his brakes. The car actually grazed the boy as he stepped almost from the wide open jaws of death to safety.

"That boy has done that trick time and again, but this time came pretty near being the last," said the motorman, as the look of contracted agony passed from his features.

A MINE ACCIDENT.

Two Koontz Mine Workmen Injured by an Explosion.

Yesterday morning about 5 o'clock there was a bad accident at Koontz's coal bank, at the head of Forty-eighth street, South Side, by which two men employed in the mine were seriously injured. August Sellor and Alfred Greenleigh are miners employed at the Greenleigh are miners employed at the Koontz shaft, and about the hour mentioned they had lighted a fuso for a blast. They started to get out of the way of injury, when the powder exploded prematurely. The concussion threw both men to the floor, and they were covered with coal loosened by the explosion. Seller got out, but Greenleigh was covered up by hundreds of pounds of coal. A few minutes' work brought him to view, and as soon as possible he was taken to his boarding house and Dr. Stathers was summoned. Three ribs were broken, the right collar bone crushed and the left arm broken. His recovery is considered doubtful.

"THE DISTRICT FAIR."

A Successful Presentation at the Opera-House Last Night.

At the Opera House last night A. Y. Pearson's drama, "The District Fair," as produced for the first time in Wheeling. Of course it turns on a rac-ing scene, but unlike all the rest, this ing scene, but unlike all the rest, this does not depend on mechanism. The horses actually dash across the stage, leaping hurdles as they go. The story is a little trite, but the characters are interesting. The scene of the rescue of the racing horse from the stable which has been fired by the villain, and the scene where the tug tows the big vesselout of port, are very realistic and impresses. scene where the tug tows the big vessel out of port, are very realistic and impressive. The cast is adequate. Old Dave Hauchett as the blacksmith shows much force. Noil Sculley as Phil shows himself a good character actor, and Missos Ingram and Italia are very good. There is much in the play to provoke smiles and a little to moisten the eyes. The audience, especially the gallery, was very appreciative. The piece will be repeated this evening.

ARE YOU.

Open to Argument?

Isn't it a significant fact that the converts are all to Ready-Made Clothes? One by one you are understanding more about Ready-made Goodness. The waste of time and money in having clothes made to order is becoming more apparent. We're gaining customers and the tailors are losing them, at ONE-HALF THE COST is a strong argument. Our guarantee to give you satisfaction or give you your money back makes the experiment a safe one for you to try.

If your tailor is to be believed, you're a pitible deformed mortal. He tries to make you think there is something crude and unfinished about the garments that you can jump right in.

Souvenir. Our own and origi-nal idea. Nothing like it ever before offered. Every purchaser during this week entitled to one. That's all bosh. There isn't a custom shop in this city that can turn out any Finer Suits than we've got on our counters. Now they can't buy any finer fabrics than are used in their construction. They can't trim any more elegantly, make any more carefully, cut any more stylishly, fit any more perfectly than hundreds and hundreds of our Single and Double Breasted Sack Suits, Three or Four Button Frock, or our Elegant Extra Long Regent Cutaway Frock Suits and separate Trousers that comprise our inimitable steck.

Thore'll be a rush this week for THE HUB'S Elegant St. Patrick Day Souvenirs, THE HUB'S own original combination. One to every purchaser all this week, including St. Patrick Day!

The same fashion plate direct our shears as theirs. We keep strictly within the bounds of genteel refined effects, and when we say \$10 00, \$12 00, \$15 00, \$18 00, \$20 00 or \$25 00, we don't wonder it's a strange sound to your ears after the \$25 00, \$30 00, \$35 00 and \$40 00 askings you've been in the habit of hearing, but the only difference is the price. You can't get such clothes made everywhere, though-nowhere else in Wheeling. You can pay more but there isn't our variety-nor the same high class work to show for it. They're lacking in fine points that you are used to, but the price is \$5 00 and \$10 00 more than ours. We'll leave it to you. We'll leave it to any impartial judge if better suits can be produced. We're as near the top of perfection as it is possible to get.

It is a black wool material with a silk warp made in a number of qualities, heavier than Henrietta, specially suited to present fashions; it has body without weight: it is claimed that no similar fabric with equal dust-shedding quality has ever been pro-duced. It is an improvement on Henrietta.
